

BASIC PUMP STARTER

Automation Group's Baker Switchboards division has been manufacturing premium switchboards for over 60 years. The WP7A-IP65 is a control box that starts and stops pumps. The customer sets start times with analog 24hr time clock. Pump is stopped by an over pressure switch that can be adjusted by customer to suit. The control Box can operate pumps up to 2.4kW.

PRODUCT HIGHLIGHTS

- Compact design
- Ease of setup with Analogue Time clock
- IP65

FEATURES

- 24Hr 7 Day program time clock
- Manual Override
- Motor protection with no flow cut out
- Control power protection
- Impact resistant enclosure to IK08

APPLICATION

Residential, Commercial, Industrial and Mining. All applications that require flexibility with adjustable start times via time clock and over pressure cut out.

TECHNICAL SPECIFICATIONS
